SOURCE: Interviewer, Louie Tagaban, El Centro, 6 June 19, 1958

I can predict things that will happen in the future. A few years back I predicted that there would be a World War II, satellites, rockets to the moon. I got in touch with the newspapers and priests, but nobody listened to me. I now predict that the first rocket to the moon shall go up, over, and around the moon and shall never be heard of again. I predict another great war. I predict that the Imperial Valley shall go dry, crickets will invade it and eat everything. Then ~~will~~ volcanoes shall erupt and destroy what is left. I am blessed with this divine gift for a reason, but nobody will listen. It is ~~is~~ just like Noah and his ark. Nobody would listen until it was too late.

There is too much discrimination in the U.S.A. We are not treated right. People abuse of us. This should not be. Everybody should be brothers. When the things I predicted happen, everybody will need each others help. If we are treated right, we will remember, and stretch out our hands to you when you need help. ~~WE~~ will be glad to help you. As things are now, there is too much hate, all because of money.

You say these questions will be used to compare notes and questions taken from other braceros from other regions. Well I don't think you will get good answers since many of the people in Mexico are from remote regions that are uncivilized where as some people, like me, are from highly civilized cities. Your notes and questions will be way off. How can you possibly compare them and then judge Mexico like this?
